

Elementary Choose Your Own Adventure

Field Trips

*Field trip experiences take place on
Wednesday or Thursday each week.*

Week 1 Welcome to Cedar River! June 26

We'll explore our 12 acre classroom and visit the Cedar River, using important camping skills like setting up tents, building a fire, and finding out what to do if a bear stumbles into your camp.

Week 2 Navigating Nature July 3

Let's take our nature journals on an off-campus adventure! Day campers will take a walk back in time and explore SHADOW Nature Preserve's 10,000 year old peat bog. We'll explore this ecosystem together and do a few fun activities along the way!

Week 3 Creative Enterprises July 10

We'll trek to Kubota Gardens to be inspired by shapes in nature, taking a closer look at weeping trees and gnarly branches. Our sketchbooks will provide a great place to document what we see!

Week 4 Epicurious Date TBD

Let's check out what tempts our taste buds! We'll experience the chocolate-making process with a tour of Seattle Chocolate Factory, tasting our way through the history of chocolate.

Week 5 Try-It Technology July 24

We'll extend our technology investigations to the Living Computer Museum, exploring computer history and the rapidly changing world of computers. A guided activity in the Labs will complement the hands-on exhibits in the museum.

Week 6 Ride the Waves Date TBD

Summer is heating up and what better way to cool off than to explore the water around us? Let's grab our field gear - re-searching our nearby creek and river, and graduating to Seahurst Beach, where we hope to meet up with the Seattle Aquarium Beach Naturalists!

Week 7 Wild Things Date TBD

Our planet is vast and creatures many. And we have so many zoos to choose from! We'll take our explorations to one of our local zoos—Woodland Park, Point Defiance, or Cougar Mountain—to learn more about wild and domesticated animals.

Week 8 Brains and Brawn Aug 14

Let's go bowling! Challenge a friend, yourself, or team up in small groups while we improve our games at ACME Bowl. Hand-eye coordination, mathematics, and a little bit of luck will make for a fun field trip for all!

Week 9 Team Talents Aug 23

It's the last week of summer, so let's make a splash! We'll wrap up the summer with Henry Moses Aquatics. Dive into fun with water slides, lazy rivers, wave machines, and spraying water.

Theme Week Field Trips

Off-site field trips for Theme Weeks will be determined near the start of each week and are scheduled to take advantage of the best weather and traffic conditions for the field trip locations.
